CONTACT

PASSION IN SEED!

Sakata has more than 100 years of experience in providing growers with innovative and value-added genetics. We take pride in our reputation as innovative breeders and producers of top quality seeds.

In today's market, the key to success is making the connections that work. In the commercial chain from breeder to consumer, it is important that each link understands the needs of the other, in order to make their contribution to the end product - because the success of one is dependent on the success of another. Sakata connects with the links throughout the chain, in order to create products that offer added value for the distributor, plug producer, grower, retailer and the end consumer.

Breakthroughs in breeding are at the core of Sakata's success, and a pillar on which we grow. One example of this is the renowned Zinnia Profusion series, first awarded a Fleuroselect Gold Medal for breeding excellence in 1999! In the most recent trials, Profusion Red Yellow Bicolour was awarded the coveted 2022 Gold Medal award, making Profusion the most prolifically awarded series in the 50 year history of the Fleuroselect organisation.

In this catalogue you can also discover many more new introductions in our extensive bedding and pot plant and cut flower assortments.

In a time where personal connections have been disrupted, Sakata has risen to the challenge.
Find us online at our corporate website, www.sakataornamentals.eu or one of our linked brand websites for more inspiration and ideas. Connect with us on social media, by email, or just simply give us a call!
Connect with Sakata's seed assortment, and let our top quality genetics build your business!

We wish you first and foremost good health, prosperity, and every success in growing your business with Sakata genetics!

AWARDS

Award Winning Seed Varieties Sakata regularly enters new varieties into industry trials to be judged by peers and experts. Both the Fleuroselect and All-America Selections entries are evaluated anonymously under code number in numerous trial grounds in different locations. Awards granted by both organisations are universally recognised as true symbols of excellence.

Fleuroselect

Sakata is a member of Fleuroselect, which is the international organisation for the ornamental plants industry. Its main activities include the testing, protecting and promoting of new flower varieties.

FS Gold Medal Winners
- 2022 Zinnia Profusion Red Yellow Bicolour
- 2018 Zinnia Profusion Red
- 2017 Begonia Senator iQ Rose Bicolour

Historical Gold Medal Winners:
- 2014 Zinnia Profusion Double Hot Cherry
- 2003 Dianthus Can Can Scarlet
- 2002 Pansy Ultima Morpho
- 2001 Zinnia Profusion White
- 1999 Zinnia Profusion Cherry

All-America Selections

Sakata is also a member of All-America Selections, an independeant, non-profit organisation that tests new varieties then introduces only the best garden performers as AAS Winners.

All-America Selections Gold Medal Winner'
- 2021 Zinnia Profusion Red Yellow Bicolour

All-America Selections Medal Winner
- 2019 Begonia Viking XL Red on Chocolate
- 2018 Gypsophila Gypsy White Imp. 2013 Zinnia Profusion Double Hot Cherry
- 2013 Zinnia Profusion Double Deep Salmon

Historical AAS Winners:
- 2004 Gypsophila Gypsy Deep Rose
- 2003 Dianthus Can Can Scarlet
- 2003 Petunia Merlin Blue Morn
- 2002 Pansy Ultima Morpho
- 2001 Zinnia Profusion White
- 1999 Zinnia Profusion Orange
- 1999 Zinnia Profusion Cherry

BEDDING PLANTS

From core products like Begonia and Pansy, to specialities like Zinnia and crops that differentiate your assortment like Gypsophila and Trailing Antirrhinum, Sakata's bedding plant offering is bred for efficient production for growers, retail appeal and consumer satisfaction.

AGERATUM HOUSTONIANUM F1

BLUE HORIZON

The first F1 triploid Ageratum strain highly suitable for garden bedding use. Due to the triploid breeding, Blue Horizon has larger blooms than traditional ageratum, is very vigorous and is easy to produce.

- Tall growing, with strong, sturdy stems and numerous branches
- Very high flower productivity

Blue Horizon

Annual | Landscaping | Upright | 75 cm | 20 cm | Bedding plant | Half shade + full sun | 6,000/gram (normal seed) | Normal, pellet | 10,5 - 12 cm

AMARANTHUS TRICOLOR

EARLY SPLENDOR

Strong and colourful landscape item adds height to flower beds in warm areas. Ideal for extra impact late in the summer after other summer bedding plants have peaked.

- Plant height: 60-80 cm, with fertilization up to 1,5 m

Early Splendor

Annual | Landscaping | Upright | 100 cm | 20 cm | Bedding plant | Half shade + full sun | 80,000/gram (normal seed) | Normal | 12,5 - 15 cm

ANEMONE CORONARIA F1

HARMONY

Dwarf, compact, multi-flowering plants with large flowers on strong stems. Superb cold crop for premium pots in early spring.

- Suitable for early spring sales
- Harmony is ideal for Valentine's Day, Easter and Mother's Day
- Combine with pansies, dianthus, bellis and poppies for spectacular mixed containers
- Cultural requirements are similar to Bloomingdale ranunculus
- Approximately 25% of Harmony Blue will be double flowers

Perennial | Bedding + Mixed combo, patio | Upright | 30 cm | 20 cm | Bedding plant | Half shade | 2,300 - 2,800/gram (normal seed) | De-fuzzed seed | 10 - 12 cm

ANEMONE CORONARIA F1

HARMONY DOUBLE

Dwarf, compact, multi-flowering plants with large unique double flowers on strong stems. Superb cold crop for premium pots in early spring. Complimentary to Anemone Harmony series.

- Compact habit
- Very uniform
- Goes well together with Ranunculus
- Ideal for Valentines, Mother's Day and Easter
- 5 colours

Perennial | Bedding + mixed combo | Upright | 30 cm | 20 cm | Bedding plant | Half shade | 2,300 - 2,800/gram (normal seed) | De-fuzzed seed | 10 - 12 cm

ANTIRRHINUM

Spring or autumn, upright, mid-height or trailing - we have a Snapdragon Series to meet your needs. Sonnets are regal and upright with fantastic landscape presence, Floral Showers have eye-catching bicolors and trailing Candy Showers offer something completely different. Sakata's Antirrhinum assortment has reliable products for 'snappy' solutions.

ANTIRRHINUM MAJUS NANUM F1

CANDY TOPS

Candy Tops is a sweet addition to Sakata's Snapdragon assortment. Strong stems make for better shipping and retail appeal, whilst an abundance of blooms on dwarf plants means constant colour. Sweet fragrance is a plus! A show stopper that plays well with others in mixed containers, Candy Tops is available in five sweet colours.

- Especially bred for spring in Northern Europe and autumn cultivation and winter flowering in Southern Europe
- Ideal for production in 10,5 and 12 cm pots
- Stronger main stem compared to current dwarf series
- High uniformity
- Striking, appealing colours
- Fits between Floral Showers and Sonnet

CANDY SHOWERS

Beautiful as a single colour or as a mixture of colours from the series, Candy Showers is ideal for baskets and containers. Try combining with Pansies and other cool season crops for spring or autumn sales.

- Can be sold in spring or autumn; excellent addition to autumn trailing pansy sales
- Trailing habit makes Candy Showers ideal for use in hanging baskets and mixed containers
- Fill baskets with Candy Showers in single colours, a series mix or in combination with other cool-season favourites such as Pansies or Bellis
- Spreads well in garden beds
- Strong, flexible stems are resistant to breakage in transport and hold up well in the garden
- 7 rich, eye-catching colours, excellent at retail and a splash of colour in the cooler seasons in the garden

ANTIRRHINUM MAJUS NANUM PUMILUM F1

FLORAL SHOWERS

Floral Showers is a fast, day-length-neutral series that flowers within a tight window in both spring and autumn.

- Dwarf habit makes this a good product for pack and pot culture in 10 cm pots with little or no PGR
- Wide colour range including bright colours and unique bicolours
- Very uniform habit between colours so can be sold in separate colours or mixes
- Cool crop, requiring little or no heat, resulting in low production costs
- Side shoots produce early flowers for more colour impact
- Versatile, for use in mixed containers, baskets and beds

ANTIRRHINUM MAJUS NANUM F1

SONNET

Sonnet is easy to cultivate with a good, uniform growing habit, strong root system and sturdy branching. 12 hours day length required for flowering, suitable for late spring to autumn sales. Long flowering season, main stem is surrounded by numerous flowering spikes. Bright colours are an eye-catcher in garden beds and attractive for use as home garden cut flowers, with the added bonus of a delightful fragrance.

- Well suited for large containers but can be grown in smaller pots with PGR application
- Cool crop requiring little of no heat
- Versatile: plantings in patio containers and landscape or garden displays

ANTIRRHINUM MAJUS NANUM F1

SPEEDY SONNET

The Speedy Sonnet series requires only 10,5 hours of daylight to bloom, making it not entirely day length neutral, but going a long way toward the goal. Speedy Sonnet needs 1,5 hours less light than Sonnet. In all other respects, Speedy Sonnet can be treated like Sonnet.

- Earlier flowering Sonnet type requiring 10,5 hour photoperiod to flower
- Bred for early spring sales or later autumn sales
- For early autumn flowering in warm weather areas, choose Sonnet

BEGONIA VIKING EXPLORER

VIKING™ BEGONIA

BEGONIA X HYBRIDA F1

VIKING™ EXPLORER

NEW AND UNIQUE! All-new Viking Explorer is a true breeding breakthrough, the first hybrid Begonia of its type with a strong and intrepid trailing habit! With Viking blood and an adventurous heart, Viking Explorer holds up well under a wide variety of weather conditions, from cool and wet to the hottest sun, and feels right at home in any garden or landscape in almost every corner of the world! Ideally suited to hanging baskets or taller containers where it can really show off its all-over flower power and impressive colour!

- Early flowering
- Unique trailing habit with flowers on top and all sides of the plant
- Extreme blooming power through the whole season
- Strong and vigorous plants for the ultimate show
- All wheather resistant; hot, cool, dry, wet; Viking Explorer is the all-round performer.

BEGONIA SEMPERFLORENS F1

Begonia semperflorens F1 is one of the hard working cornerstones of Sakata's ornamental assortment. Strong, reliable varieties that remain consumer favourites year after year, tried and trusted and not at risk of changing trends. Sakata's varied Begonia semperflorens assortment offers something to please everyone.

- Ambassador and Senator^{iQ} are ideal for early-season flowering in packs
- Emperor is large flowered and early flowering
- Alfa is for late season with excellent garden performance

BEGONIA SEMPERFLORENS F1

AMBASSADOR

Ambassador is a rich green-leaved series for early production featuring large flowers on compact plants. The pack performance of Ambassador and Senator[IQ] is outstanding. The seed quality of these series, in combination with a compact habit, very high uniformity and a tight flowering window, make an extremely dependable product.

- A proven performer for pack production
- Wide range of vibrant colours with green foliage
- This series includes the best Scarlet on the market
- Excellent series uniformity, matching our bronze leaf series, Senator[IQ]
- Flowers abundantly even under hot, humid conditions
- Excellent performance in mass plantings in outdoor beds

BEGONIA SEMPERFLORENS F1

PRESIDENT MIX

A popular mix of our green leaf Ambassador series and bronze leaf Senator [IQ] series.

- A uniform mix with identical crop timing between all colours

Annual | Bedding | Mounding | 20 cm | 20 cm | Bedding plant | Half shade + full sun | 70,000/gram (normal seed) | Normal, pellet | Pack, pot 9 - 10,5 cm

BEGONIA SEMPERFLORENS F1

SENATOR[IQ]

Sakata's breeding experience and dedication to quality genetics is exemplified in Senator and Ambassador, and in line with this we upgraded the Senator series to a complete new level: Senator[IQ]. Genetics in series marked with the symbol[IQ] are more than just 'improved'. This symbol indicates a complete upgrade across all characteristics in a series. Senator varieties marked with the[IQ] symbol have darker bronze foliage, are non-stretching in the pack/ pot and have a more uniform early flowering habit. Fleuroselect judges awarded Senator[IQ] Rose Bicolour a 2017 Fleuroselect Gold Medal.

- A proven performer for pack production
- Wide range of vibrant colours with bronze foliage
- This series includes the best Scarlet on the market
- Excellent series uniformity, matching our Ambassador green leaf series
- Flowers abundantly even under hot, humid conditions
- Excellent performance in mass plantings in outdoor beds

BEGONIA SEMPERFLORENS F1

ALFA

Alfa is somewhat later flowering, therefore easily filling packs and pots. Excellent garden performance.

- Medium early
- Excellent garden performance
- Strong, sturdy plants

Scarlet

Rose

White

BEGONIA SEMPERFLORENS F1

EMPEROR

Emperor combines early flowering with unbeatable pot performance, large, eye-catching flowers and bright green foliage. Excellent garden performance, works equally well in containers.

- Fastest variety on the market - flowers 5 to 12 days earlier than other major varieties in this class
- Uniform flowering window, resulting in a quick turnover of crops
- Compared to Ambassador, Emperor is slightly more vigorous and taller with larger flowers
- Flowers continuously, even under hot and humid conditions

BEGONIA SEMPERFLORENS F1

QUEEN

Queen is the first double-flowered Begonia from seed, offering a uniform plant habit and consistently double-flowered plants. Queen is an excellent choice for tough garden conditions where heat, direct sun and drying winds destroy ordinary Begonias. Double flowers make this a good choice for hanging baskets.

- Seed type with fully-double blooms
- More cost-effective compared to similar varieties from cuttings
- More vigorous plant habit and heat tolerance compared with other standard semperflorens

Mix

Red

Rose

Pink

BEGONIA TUBERHYBRIDA F1

FORTUNE

Fortune is the ultimate tuberhybrida for fast and high density cultivation, minimal shrinkage at retail and a great garden performance. Large, showy flowers bloom well above the foliage for maximum impact. Within the series, specially selected 'Quick and Compact' colours offer the fastest, best matched colours of all.

- Spectacular double flowers in beautiful colours
- Rich and free flowering habit with shorter, stronger flower stems
- About 10 days earlier in flower than competitive series: Sow later and save costs
- Naturally compact (chemical growth regulation not required)
- Excellent shelf life
- Eye-catcher at retail

BELLIS PERENNIS ANNUA

GALAXY

Galaxy is a cost-effective crop that can be sown in autumn for spring sales or in summer for autumn sales. Cold temperatures are not required to initiate flowering, a plus in areas with warm spring conditions or during production for autumn sales.

- Compact plants with short leaves are ideal for pots and packs
- Very floriferous, semi-double blooms
- Excellent when combined with Pansies and other cool season favourites
- Flowers continuously all winter in mild areas
- In cold areas, Galaxy will go dormant in winter and flower again in spring

OSAKA IQ & OSAKA

An upgrade of a classic! Sakata's Osaka Brassica series is known and loved for its compact flower habit with colourful leaves and wavy edges, a true autumn favorite. Osaka IQ varieties are improved across all series characteristics, with particularly the early colouring offering advantages for earlier season sales. Superbly uniform across the series for worry-free programming. First upgraded varieties to be introduced are Osaka IQ Red and Osaka IQ Pink Bicolour.

- Layers of leaves with wavy edges
- Tighter, more compact flower heads
- Less stretched plants even without PGR
- Produces high quality plants with good uniformity

CALENDULA OFFICINALIS NANA

CALYPSO

Brightly-coloured pot Calendula with large blooms on top of vigorous plants that are well-suited for long life in garden beds and large containers in cool conditions. Planted in spring or autumn, Calypso continues to flower in milder winter climates.

- Ideal compact plant habit for pack and pot sales
- Vigorous garden performance
- Produces abundant bright, large flowers with black centers
- Suited for autumn to spring sales, especially in mild winter climates

Orange with Black Center

Annual | Bedding | Upright | 30 cm | 20 cm | Bedding plant | Half shade + full sun | 130/gram | Normal | 10,5 - 12 cm

CATHARANTHUS ROSEUS

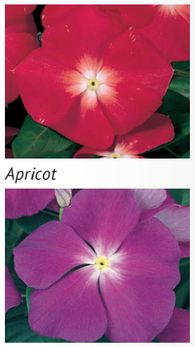

VICTORY

Vinca Victory has an extremely vigorous root system, which promotes excellent disease resistance tolerance. This uniform series produces strong, upright and bushy plants with an abundance of large flowers early in the season. Available in a good range of popular colours.

- Vigorous, finely-branched roots support good disease resistance
- Low and early basal branching fills pots and packs fast

CATHARANTHUS

VIRTUOSA

Virtuosa is the newest F1 Vinca series from Sakata with a compact and uniform habit and good basal branching in pots. It performs well in the garden or in pots or mixed containers. Thrives under a wide range of conditions and is especially suitable for warm and humid areas.

- Large flowers with round flower shape and strong, overlapping petals
- Sturdy, upright plant habit
- Good basal branching, fills the pot well
- Recommended for pots (10.5-12cm), packs and mixed combinations
- Series now includes 12 colours and one mix

CELOSIA ARGENTEA PLUMOSA

DRAGON'S BREATH

Dragon's Breath puts the fire into Celosia! This unique plant stands out not only for its dramatic red foliage and plumes, but also for the many versatile ways it can be used. Due to its day-length responsiveness, Celosia Dragon's Breath is suitable as spring colour, hot summer item or autumn extender. Or how about indoors to warm up the winter or fire up the festive season!

YUKATA

Celosia Yukata is ideal for direct sowing for spring and summer sales. Looks great when multi-planted in containers and is extra-compact, fast and easy to produce.

- Fast crop time, grower friendly
- Late spring or summer production
- Direct sowing, also in containers, maximises plant growth and height and avoids damage to delicate roots
- Dense, attractive, non-fading plumes in bright colours

CLARKIA AMOENA NANA F1

SATIN

Satin is a very compact Godetia, ideal for patio and balcony pots, or as a bedding plant in cool, dry conditions.

- Uniform plant habit, early flowering
- Good basal branching
- Responds well to PGRs
- Outstanding performer for 12-15 cm pot production
- Produces a mass of large flowers in attractive pastel shades
- Sold as a mix

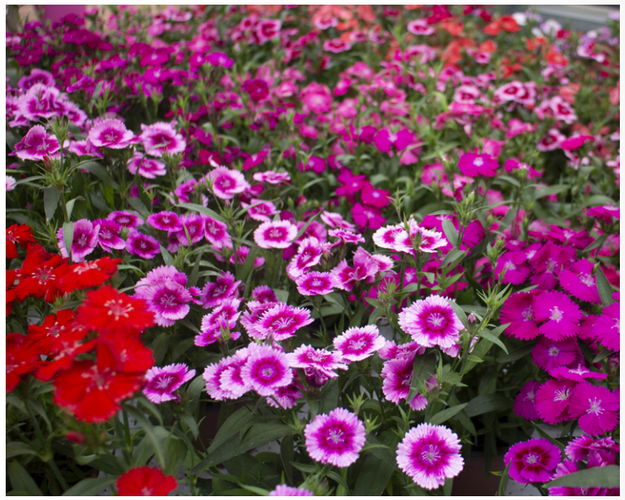

Annual | Bedding + landscaping | Upright | 30 cm | 20 cm | Bedding plant | Half shade + full sun | 1,300/gram | Normal | 15 - 21 cm

DIANTHUS X HYBRIDA NANA F1

DIANTHUS

Diamond offers excellent garden performance in spring and autumn and stays colourful through milder summers. Flowers on main and lateral stems for extra impact.

- Superb garden performance in spring and autumn, in pots and beds
- Early variety, free flowering over the whole plant
- Outstanding flower quality
- Excellent uniformity in plant habit and tight flower window
- Naturally compact when grown under long-day conditions and requires little or no PGR
- Diamond Blush Pink has a unique YTT look, flowers open white, turn pink then mature to rose

GOMPHRENA GLOBOSA

GNOME

Gnome is an ideal garden plant in areas that have hot, humid Summers. It is also well-suited to dry conditions. This extradwarf, compact plant is a nice component in mixed containers and is ideal for borders and edging.

- Very compact, suitable for packs and 9-10,5 cm pots
- Mounded plants are about 20 cm in height
- Germinates well at high temperatures
- Quick production time (4 to 6 weeks) and ease of finishing make this a good shoulder-season item
- Also available in mix

Annual | Bedding | Upright | 20 cm | 10 cm | Bedding plant | Half shade + full sun | 360/gram | Clean seed | Pack, pot 9 - 10,5 cm

GYPSOPHILA MURALIS

GARDEN BRIDE

Garden Bride has single flowers and can be used as a bedding plant, in patio containers, window boxes or hanging baskets. It forms neat mounds in the garden but cascades gently, softening edges in containers and baskets.

- Single flowers on airy, rich-flowering plants with finely textured foliage
- Easy to grow, with a short crop time for improved profitability
- Stays in constant bloom for quick sale
- Excellent for hanging baskets and mixed patio containers

Pink

Annual | Bedding + mixed combo | Mounding | 15 cm | 25 cm | Bedding plant | Half shade + full sun | 25,000/gram (normal seed) | Normal, multi-pellet | 12 - 15 cm

GYPSOPHILA MURALIS

GYPSY

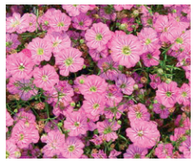

Gypsy has masses of finely textured flowers on airy, rich flowering plants. Gypsy Compact White is a real eye catcher, with wellmounded plants and fresh white blooms on dark green foliage. Attractive alone or in mixed combinations in containers or baskets.

- Easy to grow, short crop time for more profits
- Versatile production for packs, pots or hanging baskets
- Compact, neat mounded habit
- Stays in constant bloom - eye-catching at retail
- Deep Rose and White match perfectly together for 'Duo' use

LEUCANTHEMUM X SUPERBUM F1

SNOW LADY

Snow Lady is a fast-growing, first-year-flowering Shasta Daisy that fits nicely into bedding plant production and sales and offers excellent garden performance in a wide range of climates.

- Sow in autumn for early spring sales
- Hardy plant, capable of withstanding low temperatures
- Masses of pure white flowers with fresh yellow centers
- Blooms upright on dwarf compact plants without the use of PGR
- Highly disease and insect resistant

Annual | Bedding + mixed combo | Upright | 40 cm | 25 cm | Bedding plant | Half shade + full sun | 830/gram | Performax | 12 cm

MIMULUS X HYBRIDA F1

MYSTIC

Mystic includes both spotted colours and bright, clear colours, which is unusual since mimulus is usually spotted. Mystic is extra-early, free flowering and compact, making it an ideal pack item. Mystic also makes great-looking hanging baskets for early season sales.

- High germination
- Very early, free-flowering variety
- Dwarf, with a highly uniform plant habit
- Responds well to plant growth regulators
- Cool crop requiring little or no heat
- Especially attractive in hanging baskets

NEMESIA STRUMOSA F1

NEBULA

We are pleased to offer this popular Nemesia series, with large flowers that display bright, intense colour. With its excellent basal branching, Nebula has strong plants giving superior garden performance. It is also the best variety for pots and bowls.

- Nebula is available in separate colours, while so far only mix was available in the market
- Larger flowers than other varieties
- Nebula has a better habit and better series uniformity compared to other varieties

PETUNIA

Petunia is one of the 3 'P's - Petunia, Pansy, Primula - on which Sakata was founded as a flower breeding company. 'Victorious Mixed', the first-ever F1 all-double Petunia was a prize winner way back in 1934. In the following decades many more acclaimed varieties followed. Today's broad Petunia assortment reflects all the quality and beauty of Sakata's award winning experience.

PETUNIA GRANDIFLORA F1

EAGLE

Eagle is the Earliest! An extra-early flowering large-flowered Petunia with a uniform flowering window and a tidy, compact habit. Flowers 4 days earlier than Falcon.

- Compact plants with excellent branching habit
- Highly floriferous
- Maintains compact habit well at retail and in the garden
- Ideal for use in baskets, containers or for large scale bedding displays

PETUNIA GRANDIFLORA PENDULA F1

EXPLORER

Explorer is bred for use as a groundcover in garden beds. Explorer is weather tolerant and performs well in a wide range of climates. Explorer is an F1 seed product that competes favourably with vegetative Petunias.

- Spreading and cascading Petunia type, particularly suitable as a ground cover for landscapers
- Short crop time: Early flowering even under low light conditions
- Early to flower in the spring and continues to flower under the short days of autumn
- Produces new flowers at axillary nodes, not just the terminal, so provides continuous flowering in the centre of the plant
- Cost-effective in production
- Tremendous flower power
- Recovers very quickly after a rain storm

PETUNIA MULTIFLORA F1

MERLIN

The all-rounder! Bred to perform in a variety of climates, Merlin has medium sized diameter flowers with good weather tolerance. Plants are free flowering and retain their compact habit during the entire flowering season. Merlin Choice colours and Choice Mix offer the go-to colours that growers need for perfect programming.

- Multiflora with mid-sized flowers in a beautiful colour range
- Slow to stretch: allows for high density growing
- Easy, uniform and quick in production
- Plant habit remains dwarf and compact throughout the season
- Plants recover quickly after rain
- Wide range of colours including Morn and Picotee shades

PANSY & VIOLA

Sakata was the breeder of the world's first ever F1 Pansy and is today still renowned for quality and performance in this essential crop.

PANSY & VIOLA

Huge flowers? Large flowers? Medium sized? Clear faced? Blotched? Picotee? Uniqueness? Special colour mixes? For landscaping? For patio? For hanging baskets? Heat tolerant for late summer plantings? For autumn plantings? For overwintering? For spring plantings?

Sakata, the worlds first breeder of F1 Pansy hybrid, offers all this and more in our complete assortment of Viola wittrockiana and cornuta series. Since the introduction of the first F1 Pansy way back in 1970, Sakata's commitment to the creation of innovative new Pansies has been unrelenting.

The assortment includes the Premier F1 series an 'all-round' large flowered pansy, suitable for autumn, winter and spring cultivation which can be cultivated in pack and pot. Premier is the all-round, all-season large flowered Pansy with an assortment to meet your needs! Premier's assortment is tailored to offer solutions - whatever the season, wherever your customers are. Our detailed attribute guide helps you find exactly the right Premier assortment for the locations and the season. This complete series replaces the Dynamite series and includes new and improved varieties to make Premier your go-to choice in the large flowered pansy segment.

VIOLA X WITTROCKIANA F1

POWER

Power, the extra large flowered, heat tolerant series to end the spring season or start the late summer season with! Retains compact plant habit and flower power throughout the autumn and Winter. Power Choice colours and Power Choice Mix offer the grower an outstanding selection of perfectly matched varieties in both core and speciality colours.

- For packs and pots
- Non-stretching beefy plants
- Good response to PGRs
- Earlier flowering than other XL-flowered series
- Giant flowers on short peduncles
- Good winter flowering ability
- Wide range of colours

ZINNIA

Zinnia Profusion is the 'breakthrough series' that keeps on breaking through! Year after year, growers rely on Profusion for uniform habit and flowering time, and know they can grow every colour of the singles and doubles exactly the same. Sakata's breeders continue to innovate within the series, keeping the genetics at the cutting edge of technology. This has earned Profusion multiple awards over the years, and the awards keep coming. Profusion 'Red Yellow Bicolour' is the proud winner of the 2022 Fleuroselect Gold Medal, awarded for true breeding breakthroughs, no less than the fifth Gold Medal win for Zinnia Profusion varieties.

ZINNIA X HYBRIDA

PROFUSION

The undisputed series for disease resistance and uniformity, Profusion is an outstanding performer in the greenhouse, at retail, in containers and in the garden. Highly heat tolerant, an excellent landscape choice.

- Uniform series allows you to bench run all colours in the series including singles and doubles
- Disease resistant so it is easy to grow and longer flowering in the garden
- Extremely heat and drought resistant making it an excellent choice for the landscape
- Compact habit and flower quality combined with vigour and exceptional disease resistance
- Excellent uniformity - highly suitable as pot, bedding and patio plant
- Continuous flowering all summer with a self-cleaning canopy of blooms
- Excellent performance and habit in all climates
- Zinnia Profusion Red: 2018 Fleuroselect Gold Medal Winner
- **New** Red Yellow Bicolour: Beautiful Red Yellow bicolour flowers develop to attractive shades of rosy red, dusky pink and apricot as blooms age. 2022 Fleuroselect Gold Medal Winner, prized by the judges for its spectacular performance.

POT PLANTS

As container gardening and outdoor decorating continue to grow, lines are blurring between what we traditionally think of as indoor pot crops and outdoor decorating. This transition is opening up exciting possibilities for pot crops in mixed containers and in the bedding segment. Majorette and Durora Gerberas are a prime example of this crossover. Our Confetti Hypoestes, Astra Platycodon, various primroses and Campanula Appeal are other good candidates for multiple uses. For traditional pot crop distribution, we offer tried-and-true crops as well, like Sinningia Avanti and Brocade, Calceolaria Dainty and Star Wars.

CALCEOLARIA X HYBRIDA F1

DAINTY

With its compact growth and good disease tolerance, Dainty is bred for high density pot crop production.

- Compact growth habit for high density production
- Easier to handle and ship with minimum damage to leaves
- Excellent series uniformity

GERBERA

Sakata has a long and respected history as a breeder of Gerbera. Not only the classical pot types, but also the cheerful outdoor Gerbera ‘Durora’ complete the broad assortment. ‘Leader of the Pack’ in our assortment is the amazingly uniform Majorette series, bred to please the grower, the retailer and the consumer, with striking colours, great shelf life and outstanding cultivation benefits.

GERBERA JAMESONII

DURORA

Durora is an early, compact and easy to grow Gerbera, ideal for outdoor patio, balcony or bedding use, with large double flowers on compact plants. Durora’s attractive double flowers age slower than other varieties so they have long-lasting shelf appeal at retail and excellent performance in containers or in the garden.

- Large flower more than 95% double, on strong stems
- Slow-to-age flowers increase shelf life
- Uniform and attractively tone mix
- Short production time, ready-to-market 8-10 weeks after potting

GERBERA MAJORETTE

GERBERA MAJORETTE

GERBERA JAMESONII F1

MAJORETTE

Majorette series is bred for uniformity in earliness and plant habit. Due to this uniformity, Majorette is easy to cultivate and the bench run is faster than any other series. Large flowers with striking colours make Majorette look perfect at retail. The full bodied plants with a high number of stems and very good flower follow up ensure long lasting pleasure for the consumer. Majorette, more than a revolution in the Gerbera market!

Highly versatile series, easily programmable:

- Enough vigour to make steering by PGR application possible
- Good plant habit, makes body even under poor conditions
- Better uniformity compared to any other series in the market
- Healthy, small dark green leaves
- Strong, non-stretching flower stem
- Large flowers & very good flower follow up
- Centre flowering habit
- Shorter harvest period due to uniform flowering timing

GERBERA JAMESONII F1

FESTIVAL

Festival produces many large, spectacular flowers on every plant. Plants are uniform with a tight flowering window and can be produced in 8-12 weeks from potting to sales, depending on the time of year. A top performer for the grower, retailer and consumer and therefore a well-known and highly popular series.

- Highest percentage of prime quality, marketable plants
- Multiple flowers and high bud count at time of sale increases retail appeal
- Complete colour range
- Highly cost-effective series
- Colourful and very decorative pot plant for a range of uses

PRIMULA ACAULIS F1

DANIA

NEW SERIES!
Dania is an attractive, uniform Primula series for the early market. It has less cold requirement than Danova varieties, making the series highly suitable for early sowing and flowering. The Dania series has more natural compactness and therefore requires less PGR's. The brightly coloured flowers are nicely shaped, on a compact but strong plant.

- Superior seed quality with excellent seedling vigour
- A quality series for early season sales
- Well suited for mixed containers and pot plant use
- Bright, showy flowers are eye catchers at retail

CUT FLOWERS

With an international reputation for bringing major breakthroughs to the cut flower market place, Sakata's cut flower assortment provides not only superior beauty and quality but also real economic advantages in breeding and distribution. Our market leading Lisianthus is a good example of precision breeding that delivers multiple series for segmented needs in varied geographical areas and climate conditions. Sunflower Vincent®s is another example of a product that is tightly programmed for efficient, profitable production and great end-user satisfaction. Sakata's dedication to this category is infinite and we look forward to bringing more innovations to cut flower growers worldwide.

AGERATUM HOUSTONIANUM F1

HORIZON

The first F1 triploid Ageratum strain for cut flower cultivation. Due to the triploid breeding, Blue Horizon has larger blooms than traditional ageratum, is very vigorous and is easy to produce.

- Tall growing, with strong, sturdy stems and numerous branches
- Very high flower productivity

STANDARD DOUBLE LISIANTHUS

Sakata has a long and illustrious history in breeding Lisianthus and was a leader in the creation of the first double flowered varieties in the 1980s. Since that time, Sakata has developed a wide range of double Lisianthus series, now offering an assortment with an ideal selection for any season and a broad range of climates. Please see the assortment guide to help select the right series for your needs.

EUSTOMA GRANDIFLORUM F1

AUBE

'Aube' means dawn in French, and is a symbol of starting new life. Aube's large flowers with masses of petals are strong and hard for good transportation, and fill bouquets beautifully.

- Group 3, 4
- Double, large flowered
- Well filled flowers, large round flower buds
- Hard flower petals, less risk of damage in transport
- Easy to achieve good stem height

MARIACHI®

Mariachi® puts on a real show! This series features extra-double, large flowers that resemble camellias. This high quality quadruple flower has a perfect form for mixed or mono bouquets.

- Group 2
- Double, large flowered
- Excellent rose-shaped flower heads
- Long-stemmed variety - achieves up to 100 cm in height
- Thick petals for long-lasting shelf life and easy transportation

REINA CHAMPAGNE

Reina means 'Queen' in Spanish, and this beautiful large flowered Lisianthus with semi-fringed petals certainly has a regal appearance. Strong stems hold up the well-filled flowers during transportation and in the vase.

- Group 2
- Double, medium-large flowered
- Special colour, popular for modern trends
- Strong stems for good sleeving and transportability

EUSTOMA GRANDIFLORUM F1

ROBELLA

Robella is suitable for winter to early spring production, particularly in areas where temperatures are higher than standard for Lisianthus. The strong stems carry medium sized double flowers in attractive colours.

- Group 2, 3
- Double, medium-large flowered
- Excellent flower shape
- Achieves good height

EXCALIBUR®

Excalibur® was bred for ease of production and is suitable for growing in areas where temperatures are a bit higher than standard for Lisianthus. Less sensitivity to rosetting. Works well in forcing as a Group 2. Medium-large, fully double flowers and strong foliage. High percentage of flowering buds in the vase.

- Group 2,3
- Double, medium flowered
- Quick and uniform plug performance
- Strong stem and top flowering
- Easy-to-grow; achieves good height

SINGLE FLOWERED LISIANTHUS

Single flowered Lisianthus is the closest 'living relative' to the botanical ancestor of Lisianthus, the Prairie Gentian. With its fine single flowers it offers an elegant, chic alternative for classic bouquets, arrangements or the popular field bouquets. Sakata's single Lisianthus varieties have strong stems, hard petals and good disease tolerance, meaning that the only fragile part of these beautiful flowers is the look!

EUSTOMA GRANDIFLORUM F1

PICCOLO®

Piccolo® is the market standard for single-flowered Lisianthus. The delicate flowers and wide colour range make it the best known and most trusted brand for buyers and florists. Transports well with less risk of damage or disease. Piccolo is ideal for the summer season or for year-round production with artificial light.

- Group 2, 3
- Single, medium-flowered
- Strong flowers with a delicate appearance
- Wide colour range
- Best botrytis resistance for good sleeving and transportation

SOLO

Solo® is the first pollen-free series in the world, and the next generation in single-flowered Lisianthus. Solo's flowers produce no pollen, which means no mess, no stains and an even better vase life. All other characteristics match 1 on 1 with Piccolo, the market standard for single-flowered Lisianthus. The delicate but strong flowers transport well with less risk of damage or disease. The first colour we introduce is Solo 2 Pure White which will replace the current Piccolo 2 Pure White.

- Group 2
- Single, medium-flowered
- Flowers are pollen-free, no mess, no fuss
- Next generation of single-flowered Lisianthus
- Good transportability
- Hard flower petals, less risk of damage
- Versatile - attractive for mono vases, combines well with just about everything in mixed bouquets

Solo 2 Pure White

HELIANTHUS SUNFLOWER

Since Sakata first brought F1 hybrid sunflowers to the market in 1987, we've focused our breeding efforts on pollenless, uniflora varieties that perform under short day conditions and lower temperatures. With the introduction of Vincent®s we have taken a major step forward in sunflower breeding. Vincent was bred to be more day length neutral for greater flexibility in programming, allowing growers to produce high quality crops early, mid and late season.

HELIANTHUS ANNUUS F1

VINCENT®S

Flexibility in programming:

- Less sensitive to day length than other Sunflowers for greater flexibility in programming
- Better height under short days, not too tall under long days
- Allows growers to produce high quality crops early, mid and late season
- An extra ring of rounded, overlapping petals for better filled, more attractive flower heads
- Flowers face upwards on strong stems and necks
- Shorter crop cycle and concentrated harvest means increased margins
- Strong seeding and plant vigour, equals higher harvest percentage than other varieties on the market.

Vincent®s Choice

- Orange petals

WWW.HELIANTHUSVINCENTS.EU

VINCENT®S CHOICE DEEP ORANGE DMR

VINCENT®S FRESH DMR

THE NATURAL ANSWER TO DOWNY MILDEW INFECTION IN SUNFLOWERS

- Downy Mildew has created an increasing problem in Sunflower crops for the last 10 years
- It can be categorised as a fungal infection that is transmitted primarily through ground (systemic) infection and secondarilythrough air-born infection
- Up until now, the only methods used to fight the disease were use of chemicals and crop rotation
- Chemical pesticides are environmentally unfriendly, prone to development of resistance and often subject to legislation
- Crop rotation is impractical, costly and ineffective
- The ideal solution is a variety that is naturally resistant to the fungus. In vegetables, mildew-resistant varieties have been bred and implemented on a wider scale
- Following the proven performance of Vincent's Choice Deep Orange DMR under European conditions, Sakata now introduces Vincent's Fresh DMR with the same confident claim to be Downy Mildew Resistant*
- In tests and trials, Vincent®s Choice Deep Orange DMR and Vincent's Fresh DMR DMR proved resistant to general spores of Downy Mildew infectioncurrently recognised in Europe
- **ISF Definition of Resistance:**
  Resistance is the ability of a plant variety to restrict the growth and development of a specified pest and /or the damage they cause when compared to susceptible plants varieties under similar environmental conditions and pest pressure. Resistant varieties may exhibit some disease symptoms or damage under heavy pest pressure.

HELIANTHUS ANNUUS F1

SUNBRIGHT SUPREME

Like Sunbright, Sunbright Supreme is a tall cut flower variety bred for early flowering under short day conditions and low temperatures. Compared to Sunbright, Sunbright Supreme is less sensitive to cold temperatures and flowers earlier. Flowers also have more rounded petals.

- Sunbright Supreme is a short day response variety and more responsive (quicker flowering) under short day conditions than Sunbright
- Uniform and vigorous under low temperature and short days
- Strong flower stems and necks for upward-facing flower heads
- Very well suited for production of dwarf-type flowers used in bouquets
- Less susceptible to botrytis at harvest stage
- Holds up extremely well in long distance shipping

MATTHIOLA INCANA

CHEERFUL & MID CHEERFUL

Efficient, cost-effective Stock series. 90% of the plants produce double flowers without manual seedling selection. Strong stems produce voluminous, highly scented double flowers. Cheerful is an extra-early flowering variety in cool climate areas.

- 90% of plants produce double flowers without manual seedling selection for a cost effective crop
- Mid-Cheerful flowers 1 to 3 weeks later than Cheerful, depending on climate conditions
- Uniform plant habit
- Strong stems, non-branching with fresh green foliage
- Produces a profusion of highly scented blooms

Mid Yellow

Mid White

Yellow

MATTHIOLA INCANA

ARROW WHITE

Efficient, cost-effective Stock in the most popular colours. 90% of the plants produce double flowers without manual seedling selection. Strong stems with voluminous flowers. White Arrow is a mid-late flowering variety suited to a wide range of climate conditions, including warmer areas.

- 90% of plants produce double flowers without manual seedling selection for a cost-effective crop
- Uniform habit
- Suitable for cultivation in warmer areas
- Strong stems, non-branching, fresh green foliage

Also Available:
- Early Arrow White
- Extra early flowering
- Suitable for short day conditions
- Excellent plants height

MATTHIOLA INCANA

EARLY IRON

New series! Early Iron improves the uniformity and harvested quality and quantities compared to Iron in the 4 months with shorter days and lower light levels: November, December, January and February.

- Extra early flowering
- For short day conditions
- Excellent plant height
- Good quality and vase life
- Attractive colour range
- Approximately 55% double flowering without seedling selection
- Attractive for mono vases, excellent filler for mixed bouquets
